

## Performance Requirements

- The venue will need to provide a safe and constant supply of electricity terminating in a **minimum of 2 x 13 amp sockets** on or near the stage area. Ideally we would prefer 4 sockets spread evenly across the performance area.
- We will require somewhere for us to get changed (for the both daytime - if applicable and evening performances) and also somewhere to leave our belongings securely. **Please note:- that in the interests of safety and hygiene, toilets, portaloos or storerooms are not acceptable. If we deem an area unsafe or not suitable to get changed in, then we will have to perform in the clothes we arrive in.**
- Ideally, the band needs a performance area of approx. **4 metres across by 2.5 metres deep**, although we can sometimes manage with a smaller space. We are happy to liaise with the venue when there are space limitations, but please be aware that the dimensions quoted above reflect the minimum comfortable working space.
- If you have are hiring a portable dance floor, can you please let us know as we need to ensure we have sufficient clearance from the front of the dance floor to our performance area (**min 1.5 metres**). This is so that we can set up all of our equipment and still have sufficient space to perform in. It is the responsibility of the venue (or the hirer of the dance floor), not the band to move the dance floor if is needed to accommodate the band.
- We do make a polite request for food and drinks to be made available to the band at your discretion. Happy to discuss and agree this.
